## 320MM SRVFW Solar Roof Ventilation Fan Wireless Instructions

### WARNINGS

Keep fingers clear of fan blades, the fan will spin in daylight.

This product's remote contains a coin lithium battery. Keep the product and batteries away from children. Swallowing of a battery can lead to chemical burns, perforation of soft tissue and death. Severe burns can occur within 2 hours of ingestion. If you suspect a coin battery has been swallowed or placed in any part of the body, you should contact the **Australian Poison Information Centre** on **13 11 26** immediately for 24/7 fast, expert advice.

### Parts Included with Wireless Model:

- 1x 320MM SRVFW Solar Roof Fan
- 1x Remote (inc's 1x CR-2025 coin battery)
- 2x Roof Straps
- 2x Solar Panel Angle Bars
- 1x Screw Pack

### Automatic Control:

This unit is temperature controlled, once the temperature is above 25°C the fan will automatically start operating. By default, the unit is set to full power. When the solar panel output level drops the optional power pack when connected to the DC power cable attached to the wiring loom will automatically supply power to run the fan.

### Remote Control Operation:

To pair the remote to the wireless fan solar panel is in the sun or the optional power pack is connected. Depress the power button for 10 seconds until you here a long beep and the remote is now paired to the fan. One remote can be paired to multiple fans, simply power the fans and pair and the same time. if you want to use multiple fans with remotes specifically paired to each fan make sure other fans are not powered on or in the daylight when you are pairing. It is best to pair the remotes prior to install. Remote range is 20M.
