### Convert To VAST Now!

The VAST Satellite system is taking over from the existing Aurora service, WA has already started to turn off and the rest of Australia will be switched off in December 2013. VAST Satellite TV gives the traveller access to the digital TV and Radio channels that the cities enjoy. The SatKing DVBS2-800CA has been specially designed for caravan and home use. Ultra compact, easy to set up you will find this receiver a joy to use. Fully designed in Australia with features for the Australian market, like the built in easy signal finder and market leading features like the learning remote control and the optional remote sensor to place the receiver in a cupboard. Don't delay. Now is the time to change or even update your old VAST receiver to this latest model.
